#### **Note:**

Though the Council give free verbal advice and general guidance on trees, the Council cannot undertake to carry out the work itself, nor can it make any contribution towards the cost of such work, nor does it guarantee or in any way hold itself responsible for the work carried out by these firms. It is advisable to obtain at least three quotations and to ensure the surgeons are aware they are quoting competitively. You should be certain that both yourself and any Tree Surgeon you select are adequately insured. If in doubt, insist on seeing a current receipt of the insurance premium. All of the above firms should be currently insured for a minimum of Two million pounds Third Party Public Liability.

**P.S.** Glendale is a private company contracted to carry out work on Council trees, but they can also be hired to carry out work on private trees.
