

This chart shows the total number of Solihull residents who have tested positive for Covid-19 in the 14 days up to 21st October. The overall number is shown in the top left hand box and then broken down into the number of cases in each of the borough's seventeen electoral wards. It should be noted that because electoral wards are relatively small areas, that the wards with highest and lowest number of cases is liable to change from week to week.

This chart will be updated every Friday.
