

**52 Things to Support your Child's  
Speech and Language Skills.**

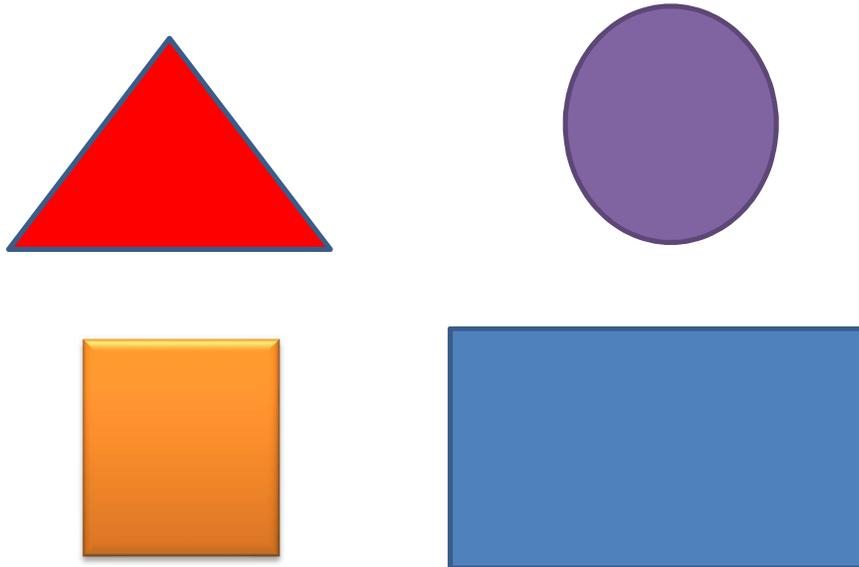

**Shapes game**

Draw a circle, triangle, rectangle and square on separate pieces of paper.

Pin the papers up in different parts of the room.

Call out the name of the shape and the child has to stand by that piece of paper. Next, work on two instructions

eg. "First the circle and then the triangle."

**Make it easier:** use only 2 shapes then introduce more.

**Make it harder:** describe the shape and the child has to work out which shape it is.
