

52 Things to Support your Child's Speech and Language Skills.

Hand and feet animals

Paint your child's hand or foot. Make hand/foot prints on a piece of paper. If you haven't got any paint draw around your child's hand or foot.

Using the print as a template, add features of any animals you choose.

Make it easier:

Challenge your child to make the noise of each animal, for example, what noise does a cat make? Who can make the best cat noise?

Make it harder:

Talk about the features of the animals. Where do they live? what do they eat? and other characteristics.
