

General Notes:

1. It is assumed that all works will be carried out by competent, accredited and adequately resource contractors in accordance with relevant legislation and established safe systems of work.
2. Access for emergency services must be maintained at all times.
3. The working area must remain free from obstructions to allow safe and efficient operation of the works.
4. All signage must be installed at a minimum distance of 450mm from the edge of the highway. This does not apply to signs installed in the carriageway.
5. Remove existing P670 50 mph maximum speed limit signs and replace with new 40 mph maximum speed limit signs (600 mm diameter).
6. Remove existing P1005 lane line markings and replace with P1004 hazard markings (4 m line, 2 m gap, 100 mm line width) to reflect the revised speed limit.
7. Install P1065 roundel road markings (7500 mm vertically elongated) to highlight and reinforce the 40 mph speed limit.

Site Safety Notes:

The Client must ensure the working area is secured at all times to prevent unauthorised pedestrian access.

All site personnel must wear appropriate PPE and follow the approved safe systems of work.

A daily site risk assessment must be carried out before commencing works.

CDM – Significant Hazards

The following significant hazards have been identified by the Designer in accordance with the Construction (Design and Management) Regulations 2015. These risks are considered non-trivial and require specific attention during construction, operation, or maintenance.

Risks During Operation / Maintenance

- Unauthorised pedestrian access to the work area.
- Vehicle movements in proximity to the working zone.
- Vehicle movements associated with the former fuel station site (future Aldi), including delivery vehicles accessing the works area, which may be frequent at times and create additional hazards due to restricted visibility and unexpected vehicle or pedestrian activity.
- Traffic not adhering to the temporary speed limit, increasing the risk to the workforce and other road users.
