As can be seen from the data, there are no locations exceeding NO ₂ limits once the measurements have been distance corrected to the nearest receptors (defined as where people are exposed for over an hour & normally measured on facades of dwellings) in line with DEFRA guidance.			
Station Road, Solihull Damson Parkway/Coventry Rd Clock Lane/Coventry Road DVLA, Stratford Road Goodway Road/Coventry Road	Tubes placed January 2018 at these additional 5 locations. DEFRA recommend the need to have at least 9 months of data (& ideally 12 months) before publishing results. We have been monitoring for 6 months at these locations so average data results are not yet available.
